Education

National University of Food Technologies (NUFT)

BACHELOR IN COMPUTER SCIENCE

Kyiv, Ukraine

Sep 2021 – Jun 2025

Experience

EKOTM

Kyiv, Ukraine - Remote

FRONT-END DEVELOPER

- Designed and developed landing page with focus on environmental friendliness and clear call-to-action
- Created modern, elegant design with compelling content structure

CyberpioneersInc

Kyiv, Ukraine - Remote

FULL-STACK DEVELOPER

- Migrated multiple websites from HTML and WordPress to Next.js + PayloadCMS with SEO optimization and dynamic content management
- Designed and developed static websites with i18n support (nime.agency, openbulgaria.eu)
- Built AI Task Manager Telegram bot with ClickUp API integration, automated task generation from text/files/audio, transcription, and smart notifications
- Developed internal staff management application with AI chat, invoice generation, time tracking, push notifications, and PWA support
- Created personal Telegram assistant with calendar/email management, vector database memory (Qdrant), and audio transcription
- Built internal ChatGPT-like application with model selection using Vercel AI SDK
- Contributed to AI-powered solutions: testing platform with AI question generation, car damage analyzer, medical case analysis tool with multi-tenancy
- Deployed and configured self-hosted services: Mailcow (mail server), BookStack (documentation), Uptime Kuma (monitoring) using Docker
- Improved CI/CD pipelines across projects with GitHub Actions, Docker image building, and Watchtower auto-updates
- Mentored junior developer, transferring knowledge and best practices
- Managed multiple concurrent projects independently

Valgonskiy Media

Kyiv, Ukraine - Remote

FREELANCE FULL-STACK DEVELOPER

- Developed custom learning management platform for video editing courses with course/lesson constructor, admin panel for full content customization, various content blocks (tests, videos, formatted text), and Docker deployment.
- Stack: Next.js + PayloadCMS + MongoDB
- <https://school.valgonskiy.com/>

Skills

Frontend: Next.js, React, TypeScript, Tailwind CSS, CSS3

Backend: Node.js, PayloadCMS, MongoDB, RESTful APIs

AI: OpenAI API, Vercel AI SDK, RAG, Vector databases, Audio transcription

DevOps: Docker, CI/CD, GitHub Actions, Nginx, VPS management

Tools & Other: Git/GitHub, Telegram bots, Google Cloud, Stripe, Figma

Projects

Wuji.world

Next.js, PayloadCMS, MongoDB

READING PLATFORM WITH USER AUTHENTICATION, ROLE BASED ACCESS CONTROL, REVIEW/COMMENT SYSTEMS

WITH MARKDOWN SUPPORT. ANALYTICS (LIFETIME): 21 USERS, 1.79K VISITORS, 5.21K VISITS, 28.3K PAGE VIEWS, 18M

44S AVG. DURATION
